

SUMMARY

Self-taught Software Engineer specializing in high-performance full-stack architecture and AI-native systems. Deeply committed to the KISS philosophy, focusing on high-signal engineering and minimal visual noise. Proven winner of the Xalkadoon Hackathon 2025 for engineering large-scale, social-impact software ecosystems.

SKILLS

Languages:

Go, TypeScript, Python

Frameworks:

Next.js, NestJS, Astro, Flask

Tools:

Arch Linux, Neovim, Docker, Git, Bun

- EXPERIENCE
- Independent Software Consultant

Hargeisa, Somaliland

Solutions Architect

Jan 2026 – Present

◦ Aduunyo Migration Engine:

Architected a production-grade ETL framework to migrate sensitive asset-financing data, achieving 100% schema integrity and reducing migration time by 60% through programmatic automation.

◦ Business Intelligence:

Engineered real-time auditing and validation scripts in Python to streamline high-volume data transfers for enterprise-level operations.

• Ardaykaab Academy

Hargeisa, Somaliland / Remote

Mentor

Jan 2026 – Present

◦ Instruction:

Leading cohorts in building production-ready architectures, focusing on scalable API design and industry-standard clean code practices.

- PROJECTS
- OGAAL Platform

1st Place - Xalkadoon Hackathon

Full-Stack AI & Water Intelligence

2025

◦ Scope:

Developed a community-powered water monitoring platform featuring live water maps, dashboards, and automated USSD/SMS reporting systems.

◦ Technology:

Built a Python-driven decision intelligence engine for real-time, verified water data insights.

• Archon CLI

Open Source

Go / AI Software Architect CLI

2026

◦ Impact:

Engineered a Socratic AI tool that enforces architectural constraints and generates technical blueprints through dialogue-driven reasoning.

• Agritech-AI

Open Source

ML-Based Crop Recommendation System

2026

◦ Core:

Built an end-to-end ML pipeline using Scikit-learn and Pandas, integrated with a Next.js interface for agricultural data insights.

• Mongoose Studio

Open Source

Professional GUI for Mongoose/MongoDB

2026

◦ UX:

Developed a high-performance TypeScript/React GUI to streamline database management and schema visualization for developers.

- AWARDS
- 1st Place Winner - Xalkadoon Hackathon

Hargeisa, Somaliland

Telesom Academy & Telesom Company

2025

◦ Awarded for developing OGAAL,

a water intelligence platform to address drought scarcity. Secured a \$5,000 prize from Telesom.
